ELECTION

Commissioner for Patents
U.S. Patent and Trademark Office
P.O. Box 2327
Arlington, VA 22202

Dear Sir:

Responsive to the Office Action, mailed March 19, 2003, applicant elects, with traverse, the species in which carbon dioxide is the expansion sources. Such precursors include carbonates. Claims 1-22 and 24-32 read on the elected species. Applicant also requests redrafting of the election of species to permit election from among species that include a hydrodynamic fluid-imbibing polymer and a hydrostatic pressure modulating agent (see, Examples), but not necessarily a gaseous expansion source.

REMARKS

Any fees that may be due in connection with filing this paper, or with this application during its entire pendency, may be charged to Deposit Account No. 50-1213.

Claims 1-32 are pending. All are retained pending reconsideration of the requirement for election.
